

# Blue Sword Making 101: An Eryndor Tutorial

Supplemental Instructional Handout

## Dimensions of Blue Foam Pieces:

A (2) = 20" x 0.75"	F = 43" x 1.5"
B (2) = 20" x 1.5"	G = 6.75" x 1.5"
C = 1.5" Octagon	H = 2.5" Octagon
D = 1.5" Square	J = 44.5" x 1.5"
E = 4.5" x 1.5"	

### MAKING THE BLADE:

**Point of View:** Striking Edge of Blade  
**Steps:** 1 & 2  
**Instructions:** DAP both pieces of "A" opposite one another to the tip of the PVC (DAP the slightly wider part of "A" to the PVC). This is the flat surface you'll use to build up your blade.

**Point of View:** Flat of Blade  
**Steps:** 3 & 4  
**Instructions:** DAP both pieces of "B" onto the flat striking surface you made in Step 2. Next, DAP the "D" cap on top of PVC core. Your weapon should look like a long, rectangular box. In Step 4, lightly wrap duct tape around the tip to secure it.

**Point of View:** Flat of Blade  
**Steps:** 5 & 6  
**Instructions:** DAP the "F" strip from the bottom of the sword, over the tip, back down around the other side. Then, DAP the "J" strip over the "F" strip. If the foam isn't perfectly lined up on the bottom, don't worry, we can trim the bottom of the sword a little bit at the end.

**Point of View:** Flat of Blade  
**Steps:** 7  
**Instructions:** Take 2 half strips of duct tape and wrap them over the tip of the sword back onto the other side of the blade. Then, take two long pieces of duct tape (one for each side) and run each one from the top of the non-striking surface down to the bottom.

### MAKING THE POMMEL:

**Point of View:** Side of Pommel  
**Steps:** 8 & 9  
**Instructions:** DAP the "E" strip around the bottom of the PVC (use a small piece of duct tape to hold the meeting edges of "E" together, the DAP may not be strong enough to hold it by itself until it dries entirely). Then, DAP the "C" cap of foam to the bottom.

**Point of View:** Side of Pommel  
**Steps:** 10 & 11  
**Instructions:** We're basically repeating Steps 9 & 10. Wrap and DAP "G" around the bottom of the pommel, then DAP "H" to the bottom.

Good job! You're almost done. Reinforce the pommel with some duct tape wraps, put a cloth cover on the blade, and wrap the handle in hockey tape... lay on!
